(54) Title: ANTENNA ASSEMBLY COMPRISING A SURFACE DIPOLE

(54) Bezeichnung: ANTENNENANORDNUNG MIT EINEM FLÄCHENDIPOL

(57) Abstract: The invention relates to an improved antenna assembly, characterised by the following features: the opposing end regions (9) of the dipole halves (1') are each electrically connected to a respective connection line (49a, 49b); the connection lines (49a, 49b) lead to two amplifiers (53a, 53b); the outputs of both amplifiers (53a, 53b) are connected to the two inputs of a transformer (55), whose output is at least indirectly electrically connected to a connector (61), preferably a coaxial connector (61); one or more filters (51, 57, 59) are provided; the filters (51, 57, 59) are positioned between the connection lines (49a, 49b) and the connector terminal (61); the filter or filters (51, 57, 59) is/are designed to suppress mobile radio frequency ranges and/or to protect broadcasting signals.

(57) Zusammenfassung: Eine verbesserte Antennenanordnung zeichnet sich durch die folgenden Merkmale aus: die aufeinander zu weisenden Endbereiche (9) der Dipolhälften (1') sind jeweils mit einer eigenen Anschlussleitung (49a, 49b) elektrisch verbunden, die Anschlussleitungen (49a, 49b) führen zu zwei Verstärkern (53a, 53b), die Ausgänge der beiden Verstärker (53a, 53b) sind mit den beiden Eingängen eines Übertragers (55) verbunden, dessen Ausgang zumindest mittelbar mit einem Anschluss (61), vorzugsweise einem Koaxialanschluss (61), verbunden, elektrisch verbunden ist, es sind ein oder mehrere Filter (51, 57, 59) vorgesehen, die Filter (51, 57, 59) sind zwischen den Anschlussleitungen (49a, 49b) und

der Anschlussstelle (61) angeordnet, das oder die Filter (51, 57, 59) ist bzw. sind
